

Introducing the Diagnostic Assessment Program – Electronic Pathway Solution (DAP-EPS): Empowering patients through their diagnostic journey

Melissa Kaan, BSc, MRT (NM), MBA
Manager, Diagnostic Assessment Program, Cancer Care Ontario

UICC World Cancer Congress - August 2012

Diagnostic Assessment Programs

What is the DAP-EPS?

- The Diagnostic Assessment Program-Electronic Pathway Solution (DAP-EPS) is designed to provide shared health information to DAPs, healthcare providers and patients and their family and friends
- DAP-EPS is a joint initiative between **Cancer Care Ontario, Canadian Cancer Society** and **Canada Health Infoway**
- After completing a pilot project for Lung and Colorectal DAPs at Waterloo Wellington Regional Cancer Program and Regional Cancer Care Northwest, provincial roll-out is under way

How Does the DAP-EPS Work?

The DAP-EPS consists of two websites:

<https://provider.dap-eps.ca>

<https://patient.dap-eps.ca>

The DAP- EPS is:

- an interactive tool
- built on clinically validated disease pathways
- designed to empower patients as they progress through their diagnosis journey

The DAP-EPS: Empowering Patients

Your Health, Your Diagnosis, Your Journey

CONTROL

- ✓ Patients are encouraged to participate in the management of their health

KNOWLEDGE

- ✓ For the first time in Ontario, patients have direct access to the same diagnostic pathway and test results physicians use for diagnosis

FAMILIARITY

- ✓ Patients have a comprehensive list with contact information for all their doctors and family or friends involved in their care

TIMELINESS

- ✓ Patients know when their test results are available
- ✓ All appointments and information is current

Ella Jones: One Patient's Diagnostic Journey

Ella has been referred to Lung DAP (Diagnostic Assessment Program) by her family physician. Her diagnosis journey now begins...

What are People Saying?

“ I really like the calendar view and also the feature that allows me to look up my moms medical information. It is great because it is accurate information.”

**Daughter
Regional Cancer Care Northwest Patient**

Entering appointments is really easy and straightforward to do. I definitely think this will be beneficial for our patients once they can access it.”

**Clinical Secretary
Waterloo Wellington Regional Cancer Program**

“Physicians are really excited about the test result notification feature. They really think it will be beneficial for both patients and doctors to be notified”

**DAP-EPS Implementation Lead
Waterloo Wellington Regional Cancer Program**

What is the Future for the DAP-EPS?
