MAKNA’s journey in Vietnam

9 Cancer Registry
JULY 2009
National Cancer Registry Study visit

Light the Pink
2011
Public Health Promotion workshop to 35 Medical Student

10,000 Women Screened
2013
Breast and Cervical Screening Training for 127 Medical Doctors in 62 districts

1,250 Women Screened
2015
Breast and Cervical workshop 60 Health workers

72,000 Beneficiaries from 15 Provinces
2017
- Training of Social Health Workers 82 Participants
- Technical visit of Mobile Unit in Malaysia

2010
Anti Tobacco Lobby

2012
- MOU with Bright Future Foundation (MOH)
- Warning messages in tobacco packaging law was approved

2014
Fundraising Training for BFF (MOH) Da Nang, Hue, Ha Chi Minh, Hanoi

2016
Breast Screening for 455 Women

2018
- World Cancer Days Roadshow
- Mobile Unit Launch in Bac Ninh in October

Challenges and Solutions

Challenges

- Lengthy Registration Process
- Gap Between Urban (Overcrowded) and rural healthcare facilities
- Shortage of expertise
- Low resource settings

Solutions

- Adherence to regulations
- Cross Sector partnerships
- Training of Trainers
- Seed funding from Malaysia and transfer of knowledge
Conclusion

Low Investment

High Social Impact

Value add to existing programs with low investment
Resulting in high impact to cross border communities and partners
THANK YOU!
Palliative care e-learning resource for healthcare professionals in India
• About the ecancer Global Foundation
• Palliative care education
• Palliative care e-learning in India collaboration
• ecancer’s collaborative approach to education
About the ecancer Global Foundation

• UK based charity which provides free educational resources to the global oncology community

• Our Goal is to support the education of the global oncology community to achieve a world where all cancer patients receive the best possible care

• To achieve this we:
  • Run free and low cost educational events
  • Publish an open-access journal with a ‘pay what you can afford’ model
  • Produce free educational videos
  • Develop free e-learning resources

www.ecancer.org
Palliative care education

Over the last 5 years we have worked in collaboration with a number of organisations to develop:

• e-learning courses educational videos and publications for healthcare professionals in
  • Africa
  • Latin America
  • India
Palliative care e-learning in India collaboration

The key collaborations to develop the e-learning course for healthcare professionals in India were with:

[Logos for Cardiff Palliative Care Education and Karunashraya Bangalore Hospice Trust]
Palliative care e-learning in India collaboration

These collaborations brought us:

• International expertise
• Local experts
  • Identification of educational needs
  • Content development
  • Peer-review
  • Support for translation
• Promotion of resources
  • Including IAPCON conference
ecancer’s collaborative approach to education

We are always open to discussing potential collaborations – please get in touch!

International Cancer Control Partnership

Lewis Foxhall, MD

ICCP Partner:

University of Texas M D Anderson Cancer Center

Houston, Texas
ICCP Vision and Mission

VISION

All countries have and are implementing a resource-appropriate national cancer control plan (NCCP) that provides a framework for sustainable and equitable delivery and scale-up of population- and evidence-based, cost-effective and people-centered cancer prevention and control programs which are integrated with NCD efforts to achieve a 25% relative reduction in premature mortality from NCDs by 2025.

MISSION STATEMENT

The ICCP provides leadership, expertise and guidance to national cancer planning stakeholders and decision-makers in their efforts to develop, implement and evaluate data-driven, stakeholder-informed country level national cancer control plans.
The International Cancer Control Partnership (ICCP) was formed in 2012 by a group of international organizations engaged in supporting country cancer control planning efforts.

Partnership Goals:

Coordinate and leverage partner efforts to increase global support, political will, and country resources for development and implementation of national cancer plans.

Provide guidance to countries as they strengthen their capacity to develop, implement and evaluate national cancer plans.

Maintain and enhance the ICCP as a credible source of guidance and leadership in national cancer control planning.
ICCP Partners

Breast Health Global Initiative (BHGI) Fred Hutchinson Cancer Center, Cancer Care Ontario; International Cancer Control Congress Association (ICCCA); Oncology Education and Sunnybrook Odette Cancer Centre; WHO-PAHO, AFRO, EMRO, HQ
Partner Contributions

Hosting and maintaining the ICCP portal

Developing communications for promotion of the partnership and the resources available

Participation in technical assistance efforts, including logistical and programmatic support

Tracking regional or global planning efforts and/or related events

Subject matter expert input in a specified area

Developing new tools

Serving as partnership convener; leading or participating in a work group

Evaluating ICCP partnership outcomes

Financial support
ICCP Portal and Resources

  
  More than 900 selected information resources on planning and capacity-building for cancer control

  Sharing best practices and experience

- National cancer control plans (NCCP) and Non-communicable Disease (NCD) plans on the portal

- Technical assistance opportunities

- Global cancer joint initiatives and advocacy

Since the launch, the portal has been visited by users from over 180 countries
ICCP Joint Activities in Cancer Control Planning

ICCP Partners lead **joint activities** to help increase global awareness and communications about cancer control planning “National Cancer Control Plans Global Survey”

- 67 expert reviewers based in 16 countries examined 500 documents from 158 countries
- 120-question tool covering the cancer control continuum
- Identify best practices, and share innovative approaches
- Publication: Yannick Romero, PhD et. al; National cancer control plans: a global analysis, The Lancet Oncology 27th of September 2018

Jointly offer **technical assistance** for cancer control planning efforts

- Guidance in addressing barriers: funding, competing priorities, technical expertise
- Leadership Summits with ECHO platform and in person
- Cancer Control Master Courses
ICCP Future Direction

Build on NCCP/NCD plan review to enhance delivery of Technical Assistance

Focus on:

Countries without published plans

Countries with lack of focus on core elements such as stakeholder engagement, use of data for development and implementation, costing/financing, use of measurable objectives, plan evaluation and workforce

Countries needing to improve cancer-related priorities within NCD plans
