Helping patients meet gaps in financing their cancer journey

Teaching Financial Literacy

Alka Bisen
Financial Counsellor - Program Manager, Financial Assistance Services, Cancer Council NSW
Overview.

On average, **one in two people in Australia** will be diagnosed with a form of cancer by the age of 85.

An estimated **138,000** new cases of cancer will be diagnosed in Australia in 2018, with that number set to rise to **150,000** by 2020.

Cancer is a leading cause of death in Australia – more than **48,000** deaths from cancer are estimated for 2018. In 2014, cancer was the second most common cause of death in Australia and accounted for about **3 in 10 deaths**.

**1 in 3** cancer patients and **1 in 4 carers** will experience financial hardship in their cancer journey.
Out of Pocket Expenses.

Primary unmet practical needs:
- Financial Assistance
- Transport to treatment
- Home Help Services

Public Health System
While the patient bears a relatively small proportion of the total cost of cancer treatment in Australia, they can pay hundreds of dollars out-of-pocket per month

- Medications not covered by Medicare
- Investigative Procedures-PET Scan
- Gap fees for specialists
- PEG feeds
- Transport to treatment
- Accommodation for treatment

- Inadequate income support
- Debt
- Financial Hardship

- Incapacity to work
- Loss of Income for patient
- Loss of income of carer
- Ongoing expenses and bills

...impact treatment options and can lead to inappropriate financial behaviours
Financial Assistance Services.

Increase assistance

- Emergency financial assistance services
- Professional information & support to better manage financial concerns

FINANCING THE CANCER JOURNEY FOR PATIENTS IN ESTONIA

ESTONIAN CANCER SOCIETY PRESENTATION AT THE 2018 UICC CANCER CONGRESS IN KUALA LUMPUR

AUTHOR / PRESENTER – HANNO BOHL – ESTONIAN CANCER SOCIETY
ESTONIA

- **Republic of Estonia**, is a sovereign state in Northern Europe. It is bordered to the north by the Gulf of Finland, on the west by the Baltic Sea, to the south by Latvia by, and to the east by Russia.

- The territory of Estonia consists of a mainland and 2,222 islands in the Baltic Sea, covering a total area of 45,227 sq km

- Population of 1.3 million
The Estonian Cancer Society was established in 1992 as a non-profit organisation to stimulate anti-cancer activity and involve the public in the fight against cancer.

We currently have over 2000 members and only 4 full time staff.
ESTONIAN CANCER SOCIETY
MISSION STATEMENT

- Promote the awareness and educate the public about cancer prevention and early detection
- Rehabilitate and support cancer patients
- Help solve cancer related social problems

The Estonian Cancer Society has a strong working relationship with ……

- Ministry of Social Affairs
- Estonian Health Insurance Fund
- National Institute for Health Development
- Social and Health Care Board in Tallinn
- North Estonia Oncology Centre and the Oncology Clinic of Tartu University hospital
- In Estonia we currently have 40,000 cancer patients.
- Each year over 8,000 new cancer cases are reported where about half of these result in loss of life.
- In 2015, the number of new cancer cases reported for men was 4,231 and 4,431 for women.
- Over the past 10 years we have seen a 20% rise in the number of new cancer cases.
- Medical experts believe that more than one third of these cancer deaths could have been averted with early detection and a healthier lifestyle.

The Estonian Health Insurance Fund (National Health) covers the cost of health services required by a person in case of illness, regardless of the amount of social tax paid by or for that person.

- 95% of Estonia’s 1.32 million population is covered by National Health.
- 13% of salaries paid by each employer is earmarked to finance National Health.
- The health expenditure in 2015 was 4.9% of the nations GDP.
ESTONIAN CANCER SOCIETY
WHO IS COVERED BY EHIF

- All employed by a registered employer.
- All self employed paying the social tax.
- All pensioners with a minimum 15 years of accumulated employment with a registered employer.
- Registered housewives paying social tax.
- All mothers for a period of 3 years after childbirth.
- Unemployed who are registered for up to 1 year.

- Emergency healthcare is available to all regardless of health insurance status.
ESTONIAN CANCER SOCIETY
WHAT IS COVERED BY EHIF FOR CANCER PATIENTS

- Screening and diagnostic services
- Doctors visits and visits to specialists to diagnose the illness
- The cost of treatments and hospitalisation.
- Rehabilitation, up to a predetermined number of sessions.
- Prostheses and Medical Supplies.
  - Breast, 70% every 2 years.
  - Stoom, 90% with a quantity cap.
  - Compression supports, 90% with a quantity cap.
ESTONIAN CANCER SOCIETY
WHAT IS NOT or ONLY PARTIALLY COVERED BY EHIF FOR CANCER PATIENTS

- Prescription medicines.
- Rehabilitation, beyond the limits imposed by EHIF.
- Prostheses, not approved for coverage by EHIF.
- New or experimental cancer treatments and medications - Treatments and medications not approved by the EHIF are generally not covered. Special cases have received financial assistance up to a capped limit.
- Cancer treatments outside Estonia (Cross Border Healthcare) - Patients have to bear all up front costs and then submit a claim for reimbursement. Travel and accommodation costs are not reimbursed, only those costs related to the treatment are considered and they may be limited.
Our mandate is to improve the quality of life for all our cancer patients from receipt of diagnosis, during treatment, in rehabilitation and post cure.

Being a non-profit NGO, our mandate does not permit us to provide individual financial assistance to cancer patients. Instead, we offer a variety of cancer patient support services free of charge.

In Estonia, there are other foundations whose mandate is to provide financial assistance to those cancer patients who require special treatments not covered by national health.
ESTONIAN CANCER SOCIETY
WHAT DO WE DO

- Provide a Cancer Information Service through our website, brochures and telephone help line.
- Organize and run awareness campaigns and education classes to promote a healthy lifestyle and the importance of early detection.
- Provide a variety of patient support services.
- Organize cancer conferences with International and local speakers for our medical doctors. (since 2010)
- Lobby the government to budget and pass legislation to improve cancer services.
Estonian Cancer Society
Patient Support

- We offer education and creative therapy classes.
- We run an annual cancer patients health and training camp.
- We provide counselling and psychosocial support services for patients and their loved ones.
- We offer in house consultation on breast prostheses by a professional mammologist.
- We have a phone in help and advice service.
- The cancer patients home support foundation was established in 1966 for terminally ill cancer patients.
- We lobby our government for improved access to screening, treatment and rehabilitation services.
Cancer Patient Centres
Oncology centres in Tallinn and Tartu, offer a full range of cancer patient services including counselling by qualified support and medical staff. This is part of a network of 30 hospitals across Estonia.

The Estonian Cancer Society office has a full library of reading and video material and offers cancer related information and advice.

Our National Cancer Help line 800 2233 was established in 1994 and our internet website [www.cancer.ee](http://www.cancer.ee) gives access to the latest cancer information, a medical questions response service and a patients forum.
ESTONIAN CANCER SOCIETY
PATIENT HEALTH AND TRAINING CAMP
ESTONIAN CANCER SOCIETY
PATIENT HEALTH AND TRAINING CAMP
Working with media and journalists we run cancer education and awareness campaigns to coincide with the following international campaigns.

- Campaign against Cervical Cancer joined the international campaign in 2007 and takes place every January.
- Campaign against Breast Cancer started in 2004 and takes place every May. Also in October, we observe Breast Health Day along with all EuropaDonna member nations.
- Campaign against Colon Cancer during ECCAM in March.
- During International Cancer Week in October, we focus on a different less prevalent cancer in Estonia.

Cervical cancer screening started as a pilot project in 1996 and as of 2004 operated out of 19 health institutions across Estonia.

Colorectal cancer screening started as a pilot project in 2015 and in the following year became nationwide.

Mobile Diagnostic Cabinets for skin cancer and prostate cancer went into service in 2016.

FILMS & VIDEO CLIPS

FILMID JA VIDEOKLIPID

Eesti Vähiliit peab tähtsaks filmide ja videoklippide tootmisest, et televiisiori ja interneti kaudu teavitada suurt hulka inimesi.

2002. aastal esilinastus ETV-s neljaosaline sarja „Vähk klivi all“. Valminud on filmid ja videoklippid, innustamaks naisi tulema rinnavähi sõeluuringule.

Filmid „Mammograafia pligu all“ ja „Ära jää hiljaks“. 

Videoklipp „Õigeneegset avastatud rinnavähik on ravi tava“. 

Eesnäärmevähist rääkiv film „Mehe teine süda“ on valminud koostöös meestearst Margus Punabiga.

Nahavähi riskitugevuse käsittelev videoklipp „Õigeneegset avastatud nahavähik on ravi tava“. 

ÄRA JÄÄ HILJAKS!

ÄRA SUITSETA KOPSUVÄHİK TAPAB
In September of 2018, the cancer society’s focus was on men’s health.

2 new video clips about prostate cancer screening were produced and these were aired on national TV.

- [https://www.youtube.com/watch?v=Up2Jyq3IrBo](https://www.youtube.com/watch?v=Up2Jyq3IrBo)
- [https://www.youtube.com/watch?v=lS7f4olWdlU](https://www.youtube.com/watch?v=lS7f4olWdlU)
In May of 2018, the Estonian Cancer Society focused on metastatic breast cancer and produced a special video clip on this subject.

https://www.youtube.com/watch?v=onovNvhbi0Q
ESTONIAN CANCER SOCIETY

HOW ARE WE FINANCED?

- No national budget is allocated for our cancer society.
- We have to apply for government assistance on a project by project basis.
- Corporate donations.
- Public donations.
  - Collection boxes
  - Donation links via our website
  - Donation Environment „I Love to Help“
  - Donations via corporate promotional sales events
- Fundraising events
- National Telethons (2008 and 2015)
Since 2004, benefit concerts have become a traditional part of our annual Cancer Week events, the revenues from which are invested in cancer prevention and patient support activities.

Many of our top singers and musicians donate their time and talents for this event. Our concerts have featured all gendres of music from classical to rock. Music from The Phantom of the Opera, Jesus Christ Superstar, The Beatles, Elvis Presley, Tina Turner and Freddie Mercury, just to name a few.

FUNDRAISING EVENTS - AUCTIONS

Proceeds from charity art auctions at the Vaal Gallery in 1997, at the Estonia Drama Theatre in 1999, in the Vanemuine Concert Hall in 2000 and at the Art Museum of Estonia in 2009, have also helped to fund our activities.
ESTONIAN CANCER SOCIETY
in 2019

„Terve Eestiga Vähi Vastu“
„The Whole of Estonia Against Cancer“
„A Healthy Estonia Against Cancer“

Will be our biggest and most difficult campaign in our history. The Estonian Cancer Society is deeply concerned that since 2015 we have been without a national cancer strategy. This campaign will be focusing on convincing our political leaders that a national cancer plan is urgently needed to save lives.
In keeping with the current World Cancer Declaration which, Estonia needs to formally recognize and adhere to the recommendations outlined in the Cancer Declaration.

On September 13th 2019, this event will open with a scientific cancer conference, followed by a gala benefit concert with the opening address by the President of Estonia. The evening will conclude with a gala dinner where we hope that a high ranking official from the UICC will accept our invitation to relay the importance of the World Cancer Declaration to Estonia.
THANK YOU FOR YOUR ATTENTION
If we are facing in the right direction, all we have to do is keep on walking.
RISING FUNDS FOR CANCER PATIENTS CARE IN CAMEROON

Professor NKEGOUM BLAISE

22 years experience of CANCER CARE IN CAMEROON

camassistance

Abstract code

Track #

Disclosure of interest: None declared
PLAN

1- SITUATION OF CANCER CARE IN CAMEROON

2- MECHANISMS OF FUND RAISING
Cameroon is located on the Atlantic Coast and has an area of 47,000 km².

The estimated population is 22.5 million inhabitants.

TWO Population based cancer registries since 10 years.
80% of cancer cases arise in underdeveloped countries like Cameroon

80% of deaths in these countries

15000 new CANCER cases in Cameroon per year

Women's cancers are among the most common
Most common cancers:

liver
cervix
breast
prostate

AIDS malignancies are now common even with the introduction of HAART for HIV

Kaposi's sarcoma both in adults and infants, malignant lymphomas, squamous cell carcinoma of the conjonctiva.
Burkitt's lymphoma is still very common in children.

Hepatitis B vaccine has just been introduced.

Lack of pathologists 16 for the whole country, only 10% of cancer are diagnosed microscopically.
Radiology,
Ultrasonography
Endoscopy
are only performed in the two main cities Douala and Yaoundé

which covered only 20% of the general population.
Medical oncology/haematology services are not established.

A restricted spectrum of cancer chemotherapy drugs are available on payment.

Cancer control plan is available but financial support is necessary.
Thoracic surgery, neurosurgery and radiotherapy are scarce.

Then very little can be offered for inoperable tumours.
Precancerous lesions of the uterine cervix in Cameroonian women. Cytological and epidemiological aspects of 946 cases

Nkegoum B, Belley Priso E, Mbakop A, Gwent Bell E.
Gynecol Obstet Fertil 2001
Visual inspection with acetic acid and cytology as screening methods for cervical lesions in Cameroon.

Doh AS, Nkele NN, Achu P, Essimbi F, Essame O, Nkegoum B.

OBJECTIVES:

To assess the accuracy of visual inspection with acetic acid (VIA) as a screening method for cervical lesions.
METHODS:

VIA and cytological smears were carried out on the cervices of non-pregnant women aged 30-60 years with no previous history of cervical cancer.

Cervices with aceto white lesions or positive Pap smears, and one in ten negative cervices (control), were biopsied.
RESULTS:

5010 women were enrolled, 4813 (96.1%) were screened.
4767 (99.%) had adequate cytology smears.

574 (11.9%) had colposcopy. 1743 biopsies were obtained of which 528 were controls.
CONCLUSIONS:

VIA has acceptable test qualities and may in low resource settings be implemented as a large scale screening method.
Normal cervix
Cervical dysplasia
INVASIVE CARCINOMA
PREVENTION OF BREAST CANCERS

Breast cancer ranks highest on the list of women's cancers worldwide.

The first with cervical cancer in Cameroonian women.

Genetics 1 time out of 4

Mostly young women

Triple negative
